

### DESCRIPTION

A unique blend of solvents, penetrants, emulsifiers and boosters formulated so that when mixed with water cleaning is accomplished in both the water and solvent phases. Effectively removes oil, grease, carbon, tar, sludge and dirt from all types of surfaces and parts. Much less harmful to the hands than other harsh solvents, blends or gasoline type solvents and can be removed from the skin with a simple water rinse.

### USAGE

Its primary use is as a spray-on or brush-on cleaner for diesel engines and running gear on trucks and buses. It is also used extensively to pre-clean vehicle wheels and grease and tar encrusted areas prior to regular washing and as a small parts dip cleaner, or agitated tank cleaner. It is efficient, safe, practically odorless, economical and is effective even when contaminated with grease and oil.

### DIRECTIONS

**Spray or brush on motors and running gears:** Dilute 1 part product with 10 parts mineral spirits or kerosene. Brush or fog on to area to be cleaned. Allow to stand for 10 to 15 minutes. Rinse as you normally would clean diesel buses and trucks.

**For heavy grime on diesel engines:** Dilute 1 part product with 2 or 3 parts diesel fuel or kerosene. Use straight for severe cases. Allow to stand for approximately 30 minutes and steam off.

**Dip cleaning of small parts:** Use straight or dilute with 2 or 4 parts kerosene. Soak parts until soil is loosened, brush lightly if necessary. Can be followed by a water rinse or part may be used as is.

**Agitated tank immersion cleaning:** Use straight as a cold solvent cleaner for heads, small parts, etc. Particularly good where odor or safety is of prime importance. Agitate until soil is loosened. Spray rinse causes cleaner to emulsify carrying off loosened soil.

**Wash rack use:** Dilute 1 part product with 2 to 4 parts water. Brush on wheels, around filler necks, bumpers and other heavily soiled or greasy areas. Follow with regular washing.

**Concrete cleaning heavy oil and grease:** Dilute 1 part product with 2 to 4 parts of water. Apply on area to be cleaned and let stand for a few minutes. Agitate until soil is loosened. Then, clean as usually.

### PRODUCT SPECIFICATIONS

APPEARANCE	Clear, yellow liquid
ODOR	Mild
SOLUBILITY	Forms oil-in-water emulsion
SOLVENTS	Yes
BIODEGRADABLE	Yes
SHELF LIFE	1 Year in unopened container
PACKAGING	55, 35, 15 Gallon drums 5 Gallon pails Cases of 6/1 and 4/1 Gallon jugs

### SAFETY INFORMATION

**KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.**

**CAUTION: Danger! Combustible mixture.** Keep away from heat and open flame. Avoid prolonged breathing of mist or vapor. Harmful or fatal if swallowed. Avoid prolonged contact with skin.

#### FIRST AID

**Skin:** Wash with abundant water and soap. If irritation develops, seek medical attention. **Eyes:** Flush with water for at least 15 minutes, raising eyelids occasionally. Seek medical attention. **Ingestion:** Do not induce vomiting. Seek medical attention immediately.
